

DESCRIPTION

Revolutionary 2-component polish- & wax system which creates a unique and impermeable molecular shield on hard surfaces like gel coat, painted steel/wood and stainless steel. DULON 1&2 gives a long-lasting high gloss armour protection, is both easy to apply and economical.

- Gives an amazing deep lustre.
- Outlasts all other polish and wax.
- Easy to apply & economical in use.
- Used on many superyachts worldwide.

INSTRUCTIONS

PRETREATMENT (if required)

- Use DULON HULL & WATERLINE CLEAN 22 to remove scale and brownish/yellow stains.
- Use DULON POLY POLISH RUBBING COMPOUND (strong, medium or fine) to restore weathered surfaces also to remove dull patches, scratches, persistent stains and streaks.
- Use PREDULON 00 to remove surface dirt, grease, oil, old wax and silicon traces.

DULONATING - MANUALLY

1. Apply DULON 1 using a damp cloth or sponge and leave it to dry until white haze appears.
2. Do not rub off!
3. Apply DULON 2 using a damp cloth or sponge and leave it to dry until white haze appears.
4. Buff using a dry cloth or lamb's wool pad

DULONATING - MACHINE (concentric + medium, soft polishing pad and lambswool)

1. Lightly moisten the polishing pad (medium) and apply a small amount on the pad.
2. Spread DULON 1 thinly over surface.
3. Polish with medium rotation speed until a white haze appears.
4. Do not rub off!
5. Lightly moisten the polishing pad (soft) and apply a small amount on the pad.
6. Spread DULON 2 thinly over the surface.
7. Polish with medium rotation speed until a white haze appears.
8. Buff using a lamb's wool pad with high rotation speed.
